

Innovative Data Protection for Small and Growing Networks

Arkeia Smart Backup was designed from the ground up to be easy-to-use data protection software for small and growing networks. Smart Backup comes with a new, intuitive graphical interface yet takes full advantage of the powerful Arkeia Network Backup data protection engine technology.

Arkeia Smart Backup is a powerful network backup solution that provides small and midsize businesses with an innovative technology to help control their storage budget: integrated volume based pricing technology.

Features for Growing Networks

- Easy-to-use graphical user interface
- Integrated data volume pricing technology
- Fully leverages the powerful Arkeia Network Backup data protection engine
- Seamless migration to Arkeia Network Backup and compatibility with most application and database add-on options

- Interactive, deferred or scheduled backup
- Calendar interface to program backup "exceptions"
- Before and after backup commands
- Restore with data redirection
- Point-in-time restoration with catalog consolidated view

Easy To Use Interface

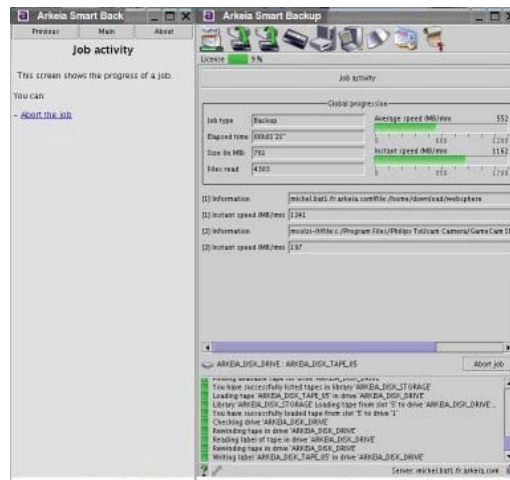

Arkeia Smart Backup was designed for non-technical users and comes with installation and configuration graphical interface and wizards.

- Simple to install, configured in minutes
- Convenient GUI with user-friendly icons
- Java interface for remote server administration from virtually any computer including Linux, Unix, Windows, Mac OS X, etc.
- Log visualization by backup, restore or full view
- Easy-to-use online help

Powerful Backup Technology

Arkeia Smart Backup features advanced technology for high speed data transfer while fully supporting disk-to-disk environments as well as traditional disk-to-tape.

- Network backup capability with client support for Windows, Linux, Mac OS X, NetWare and xBSD
- Simultaneous (parallel) backup of several machines to leverage Arkeia's multi-flow technology for reduced backup windows
- Total, incremental and differential backups backups
- Automatic bare metal Disaster Recovery option for Linux
- Arkeia hot backup modules for applications and databases
- Interactive, deferred or scheduled backup

Unique Data Volume Pricing

Arkeia Software has pioneered a pricing technology based on the amount of data stored on tapes and available for restore. This means that each Arkeia customer pays only for what they need to protect. Arkeia Smart Backup is fairly priced, with costs set according to data volume. Pay for only the data you need backed up!

- Scalable pricing model based on the amount of data you want to protect
- Data amount = amount of data on tapes and/or disks that is directly available for restore
- Automated monitoring of live data with easy path to growth

Easy-to-use data protection software with integrated volume-based pricing technology for small and growing networks.

Arkeia Smart Backup: Quick Take

- ▶ Designed for Small and Growing Networks
- ▶ Easy-to-use Interface
- ▶ Powerful Backup Technology
- ▶ Unique Data Volume Pricing

Key Differences between Arkeia Smart Backup and Arkeia Network Backup

Arkeia Smart Backup complements the flagship enterprise-class product from Arkeia Software: Arkeia Network Backup. Arkeia Network Backup is scalable enterprise data protection software designed for mid-sized and large networks. Arkeia Network Backup is ideal for enterprises with complex networks with many heterogeneous systems, including networks with SANs and networks with a significant amount of managed data.

Arkeia Smart Backup	Arkeia Network Backup
Supports Linux, Windows, Mac, Novell, and xBSD	Supports Linux, Windows, Novell, Mac, xBSD plus all major UNIX clients
Unique Data Volume-based Pricing	Node-based Pricing
Advanced Backup Options: Limited	Advanced Backup Options Included <ul style="list-style-type: none"> • Backup modification during job • Job priority management • Job inclusion/exclusion filters • Chaining jobs • Bandwidth throttling • Raw device support
Advanced Restore Options: Limited	Advanced Restore Options Included <ul style="list-style-type: none"> • Simultaneous restores of several files/directories • Serverless Restore Option
Advanced Monitoring & Reporting: Limited	Advanced Monitoring & Reporting Included <ul style="list-style-type: none"> • Configuration granularity • Detail alerts • Full command-line interface • Tape re-indexing and verification GUI • Archive tape management • Multi-user access control
Device Management: Limited	Device Management Included <ul style="list-style-type: none"> • Multi-drive management (physical support) • Tape access management • Tape library sharing • Tape duplication • I/O port management • Tape cleaning cartridge management
Basic security and encryption	Enhanced security and encryption option support
No NDMP support	NDMP optional module supported

Arkeia Software

Arkeia Software provides powerful, innovative data protection software for networked storage. Delivering the deepest and broadest support for Linux and other operating systems, Arkeia Software protects more than 100,000 networks for 5,000 customers in 50 countries. Products include the award winning Arkeia Network Backup, Arkeia Smart Backup, and Arkeia Options for bare-metal disaster recovery and hot backup of applications and databases.

100,000 Networks Protected

5,000 Enterprise Customers

50 Countries

Arkeia Options

- ▶ **Application & Database Modules**
 - DB2
 - LDAP
 - Lotus
 - MS Exchange Server
 - MS SQL Server
 - MySQL
 - Open-Xchange (including SLOX)
 - Oracle
 - PostgreSQL
- ▶ **Disaster Recovery for Windows and Linux Servers**
- ▶ **NDMP Module**
- ▶ **Encryption Module**
- ▶ **and many more!**
